ARTos Foundation has the pleasure to welcome on the next Kids University, Life Coach Elena Hadjivasiliou, for a four-day workshop especially designed for children, based on the principles of Neuro Linguistic Programming and Colour Therapy.

A new, unique workshop that blends creatively the techniques of Neuro Linguistic Programming and colour therapy with theatre activities aiming at strengthening confidence and harmonic coexistence and communication.

Activities such as story-telling and dramatization of fairy tales, visual representation of dreams, communicative team tasks and games, open discussions and presentations as well as a small excursion to a nearby spot, will be our inspiration for this four-day workshop.

With childlike enthusiasm in our luggage, with dynamism and humour, creativity and spontaneity we will go on adventures to discover how to conquer what is really ours..!
